

# Customer Success Story

CHME, a medical device distribution company, partnered with Paro to navigate an unexpected resignation and implement process improvements that enhanced efficiency and reduced risk.

## Why choose Paro experts?

Paro employs a rigorous vetting process to ensure that our network of fractional experts includes nothing but top talent. Our process includes:

- ✓ Detailed Application
- ✓ Interview
- ✓ Skills Assessment
- ✓ Background Check 

**Only 2% of applicants are accepted,** with many coming from Big Four firms and Fortune 500 businesses.

In addition, we don't pair you with just any accounting expert. Our **AI-powered platform assesses your unique circumstances** and matches you with the professional whose experience and skillset best suit your requirements.

### CHALLENGE

## Urgent need for niche expertise

After their controller resigned, CHME needed a replacement quickly to avoid disruption. They also needed specialized skills: the ability to navigate insurance billing complexities, specialized software and high-volume transactions in a HIPAA-compliant environment.

### SOLUTION

## Immediate interim controller placed

Paro matched CHME with an experienced interim controller before their outgoing controller's last day, ensuring continuity while simplifying processes and improving documentation across the finance function.

### IMPACT

## Efficiency from fractional support

CHME shortened month-end close, de-risked reporting, created an audit trail and ended up replacing the full-time role with Paro's fractional controller. This cut time spent on financial operations by more than half while maintaining accuracy and compliance.

Let's discuss how we can support your financial needs.
